Audition is a highly regarded audio post-production application that blends fast performance and professional tools with an extremely user-friendly interface. In CS5.5, Audition has greatly expanded its reach, replacing Adobe Soundbooth in many of the Creative Suite bundles and running natively on the Mac for the first time. In this course, Adobe Certified Instructor Maxim Jago introduces you to Audition's powerful features, which include a multitrack editing

environment, a comprehensive mixer, track-based controls and effects, and a separate effects rack, as well as extraordinary audio correction tools. Whether you're new to audio editing or have experience with Soundbooth, Premiere Pro, or earlier versions of Audition, this course will get you rolling with Audition CS5.5 in a hurry.
